Reviving Visions

Sharing a common cultural heritage, Eastern and Western Europe have developed different paths of scholarship and learning. *Cultural and Intellectual History Between East and West* is a double degree master's programme that combines the best traditions of scholarship in East and West. The opening conference is dedicated to find inspirations for our master's program—historical examples how students and scholars, artists and poets have created spaces in which East and West have met. We wish to create an intellectual community defined by dedication, generosity of knowledge and striving for excellence. We are guided by a vision of how traditions of humanist learning can be transformed into an inspiring and challenging way of learning.
